

To Whom it May Concern,

Our user is carrying a portable electronic device. **The device is the CUE1/CUE1+, a medical device that aims to reduce slowness, stiffness, rigidity and freezing of movement in Parkinson's disease.** The CUE1/CUE1+ utilises pulsed cueing and focused vibrotactile stimulation to alleviate symptoms.

The CUE1 and the CUE1+ have passed the EN 60601-1-2:2014 (Electromagnetic Compatibility test) and the IEC 60601-1: 2012 (Medical Electrical Equipment Safety test).

Please allow our user to pass through airport security and customs and board his or her flight/s with the device.

If you have any questions about the CUE1 or the CUE1+, please contact us at our office or [info@charconeurotech.com](mailto:info@charconeurotech.com).

Yours sincerely,

Charco Neurotech

---

To our dear users,

Please remove the CUE1 or CUE1+ before passing through any x-ray or other airport security scanner to avoid potential alerts / damage.

We wish you a safe and pleasant journey.
